Global Properties

Before we start adding css properties of each section. We must import the fonts that we will use and set universal and element properties of our coffee bean.

1. **Import font** - go to this link https://fonts.google.com/ and search for font family “Raleway”. Finally, click the download and select the import link in the ‘Use in the web’ section in your selected fonts. Click the tab @import to copy the import link and paste in your css file.

2. **Body**

```
font-family: "Raleway", sans-serif;
color: #333;
margin: 0;
padding: 0;
height: 610px;
background-image: url('../image/tea-background.jpg');
background-size: cover;
background-repeat: no-repeat;
background-position: center;
box-sizing: border-box;
```

Note! Images that will be used in the coffee bean are inside this folder.
After adding this properties, we can now proceed adding css properties to each section
